- Binh Tan District Ho Chi Minh City

#### **SKILLS**

#### **Programming Languages:**

C/C++, C#, Dart, HTML, CSS

#### Framework:

.NET Core, Bootstrap, Flutter

# Database:

SQL Server

#### **Source Control:**

Git, GitHub

#### **Soft Skills**

- Teamwork
- Critical Thinking
- Motivator & Research

## **CAREER OBJECTIVE**

I am a fourth-year student majoring in Software Engineering, deeply passionate about software development, helpdesk systems, and technology platforms that support businesses. I am seeking an internship opportunity where I can apply my academic knowledge to real-world challenges, gain practical experience, and contribute to innovative projects in software development, technical support, and process improvement.

#### **Education**

#### Information Technology

2022 - 2026

Ho Chi Minh City University of Industry and Trade

GPA: 3.0/4.0

#### **PROJECTS**

Boarding House Management Mobile App

2/2025 - Present

## Technologies: Flutter, C#, ASP.NET Web API, SQL Server

- Developed an Android mobile application to streamline rental room management for landlords and tenants. The app enables landlords to manage rooms, tenant details, rental status, and utility tracking, while tenants can view room information, rent history, and receive updates from landlords. Built the backend API using ASP.NET Web API and C#, ensuring robust data handling and smooth communication with the Flutter frontend. Emphasized responsive UI/UX design and secure data transactions. This project enhanced my understanding of mobile app architecture, client-server integration, and user-centric design.

Handicraft E-Commerce Web Application

9/2024 - 12/2024

# Technologies: ASP.NET Framework 4.5, C#, SQL Server, HTML/CSS, JavaScript

- Designed and developed a complete e-commerce website focused on selling handcrafted products. Key features included product categorization, shopping cart, user registration/login, order tracking, and an admin panel for inventory and order management. Prioritized a visually appealing and user-friendly UI to highlight the uniqueness of handmade goods. Utilized SQL Server for backend data management and implemented secure user authentication. This project provided practical experience in full-stack development and understanding customer-centric design for niche markets.
